## Education

### University of Utah, Salt Lake City UT

The Coding Bootcamp

August 2021

### Towson University, Towson MD

Bachelor of Science, Business Administration

Concentration: Marketing

December 2014

## Projects

**not-another-store** | <https://not-another-store.vercel.app>

Repository: <https://github.com/cpesar/not-another-store>

Summary:

- E-commerce web store where users can create an account, sign in to an existing account, add items to their shopping cart, and pay for their items using Stripe, Paypal or Cash on Delivery
- Admins can create, update, and delete items
- Users have 3 options for signing in- OAuth (Github or Google), or a form powered by next-auth

Front-end technologies:

- Nextjs, Shadcn, TailwindCSS

Database:

- Prisma, Postgres

Authentication:

- OAuth (Github & Google)
- Next-auth

**not-Reddit** | <https://not-reddit-alpha.vercel.app>

Repository: <https://github.com/cpesar/not-reddit>

Summary:

- Reddit-like site where users can create an account, and sign-in/sign-out via Github OAuth
- Users can create Topics and Posts, and leave comments on other users posts
- Anyone can view Posts, Topics and Comments but only authenticated users can perform actions

Front-end technologies:

- Nextjs, TailwindCSS

Database:

- Prisma, Postgres

Authentication:

- OAuth (Github)
- Next-auth

**Dock n' Flock** | <https://dock-and-flock.herokuapp.com>

Repository: <https://github.com/cpesar/dock-n-flock>

Summary:

- Designed for those who love to attend events, but hate trying to find parking, this app is a one stop shop.
- Future developments will allow users to purchase parking and event tickets

Responsibilities:

- Back-end functionality- including setting up the database using MongoDB and GraphQL, as well as setting up the server with Apollo Express Server

Front-end technologies:

- React.js, Chakra UI (front-end styling), JWT (authentication), BCrypt, Open Street Map, Leaflet

Back-end technologies:

- MongoDB/Mongoose, Apollo Express Server, GraphQL

## Work History

### ArbiterSports, Sandy UT

April 2022–Present

*Frontend Developer (React)*

- Currently building ArbiterSports new payment platform, ArbiterPay, which is utilized by state athletic associations across the United States as an efficient way to pay workers involved in sporting events from middle school to the NCAA
- Work alongside product, UI-UX, and backend developers to build a system that is efficient and scalable.
- Implemented Azure DevOps to more efficiently store data and manage tasks
- Extensive understanding of AGILE development methodologies to efficiently plan for each Sprint cycle
- In-depth knowledge of React, Redux, Typescript, Git, Node, and Azure DevOps

### EdX, Remote

June 2022–November 2024

*Teachers Assistant*

- Assist the instructor in tasks including: coordination of break out rooms, grading projects, achievement of learning objectives
- Lifelong learner with a passion for teaching students how to code and think like a programmer
- Create an engaging, positive, and inclusive learning environment for our students

### Rediminds, Remote

September 2021–April 2022

*Full Stack Developer*

- Utilize AGILE development to better understand strengths and weaknesses, individually and as a team
- Learned and implemented Transmit Security in a demo application for a future contract with a large Fortune 500 bank
- Experience with cloud applications including AWS, and Firebase/Firestore
- Further developed my knowledge of Javascript and React.js through the development of our internal application, Ground Truth Factory <https://www.apps.rediminds.com/#/login>
- Expanded on my existing knowledge of Git by collaborating with colleagues on Ground Truth Factory

### Burton Snowboards, Park City UT

December2020–January 2021

*Assistant Manager*

- Manage day-to-day operations including: opening and closing the store, cash register operations, deliveries, merchandising new inventory
- Greet every guest as they enter the shop
- Utilize a consultative sales approach to uncover guests needs leading to a sale
- Utilize marketing strategies to drive business to our demo department

### Keller Williams Gateway, White Marsh MD

June 2018–June 2022

*Licensed Realtor (Referral)*

- Proficient in contract writing, negotiation, market research, and client analysis
- Utilize a consultative sales approach by interviewing clients to develop a plan to accomplish their goals
- Maintain a high level of customer service and integrity while achieving sales expectations

### Enterprise Truck Rental, Arbutus MD

April 2015–August 2018

*Senior Account Specialist*

- Responsible for day-to-day management duties
- Teach, train, and develop new account specialists
- Develop marketing strategies to generate new business while maintaining a high level of customer service
- Reduce operating costs by utilizing multiple shops and vendors to perform truck repairs and scheduled maintenance
